

SUPPORT FOR BROAD-BASED TAX RELIEF

- ▶ **“A 10-percent across-the-board cut in marginal rates of tax is in the country’s interest, since it will encourage saving and work and thereby improve the productivity of the economy.” - George P. Schultz**
- ▶ **“Federal taxes . . . are at an all time high. It is past time that taxes be reduced. A 10-percent cut in personal income taxes is an excellent first step.” - Milton Friedman**
- ▶ **“Given the present global economic situation, we should do all we can to preserve the current economic expansion here at home. [A 10-percent across-the-board tax cut] in my opinion, will go a long way to achieving that goal.” - Lawrence B. Lindsey**
- ▶ **“Given the size of the surplus, such a tax rate reduction is essential for maintaining economic growth which, in turn, will ensure more and better jobs, higher after-tax incomes and guarantee that Social Security will remain solvent.” - Martin Anderson**
